

Fully Managed Bureau Services

Turn Your Energy Data Into Actionable Insight

What We Do – Seamless, Fully Managed Energy Bureau Services

Whether you're a school, multi-academy trust, or business managing multiple sites, our Bureau Services simplify operations and give you full control over energy costs, data, and compliance:

Key Features & Benefits:

MOP & DC Management

We handle Meter Operator and Data Collector relationships to guarantee metering accuracy, clean data, and regulatory compliance—without the administrative burden.

Smart Metering Solutions

Leverage plug-and-play meters with Wi-Fi or 4G options, MID-standard accuracy, and live tracking via dashboards. Automated accuracy, delivered.

Bill Validation & Revenue Recovery

1 in 5 business energy bills have errors. We review, validate, and correct your invoices—ensuring you only pay for what you use and securing credits when needed.

Carbon & Energy Reporting

We make reporting for SECR, ESOS, and ESG effortless. Receive tailored, audit-ready reports aligned to your internal sustainability goals.

Budget Forecasting & Management

Move from reactive budgeting to proactive financial control. Our forecasts and variance reporting keep your energy spend aligned and predictable.

Energy Supplier Management

We work with 30+ UK energy suppliers, handling your contracts, queries, and supplier relationships with efficient SLAs.

Why It Matters

Energy is one of the biggest and least understood costs for most organisations. Without the right systems, errors go unnoticed, savings are missed, and sustainability goals fall behind. Our Bureau Services give you full visibility, confidence in your data, and the

assurance that every bill, report and decision is accurate, compliant, and working in your favour.
